

# U.S. ARMY K-RATIONS by HIRAM WALKER & SONS, Inc.

Hiram Walker Helps To Feed Men at Front.  
During the past year, Hiram Walker packed more than forty-eight million K-Ration meals. Shipped in freight cars this would form a train over six miles long. If the packages were placed end to end they would extend from Peru to Berlin.  
The food is of the highest quality and if necessary would provide ample nourishment for months at a time in any climate.

## HIRAM WALKER'S DISTILLING FACILITIES ARE ENGAGED 100% IN PRODUCTION OF WAR ALCOHOL

Alcohol is a most important material in modern warfare and enters into the manufacture of fuels, chemicals, explosives, and essential civilian products.

- A Few War Uses of Alcohol:
  - 1. Gasoline, kerosene, and other fuels for aircraft and motor vehicles.
  - 2. Explosives for land and sea warfare.
  - 3. Solvents for cleaning and degreasing.
  - 4. Disinfectants for medical and surgical purposes.
  - 5. Preservatives for food and other supplies.
  - 6. Raw materials for the manufacture of plastics and other synthetic materials.
- By Products of These War Uses:
  - 1. Glycerine, which is used in the manufacture of explosives and other war materials.
  - 2. Methanol, which is used in the manufacture of explosives and other war materials.
  - 3. Acetic acid, which is used in the manufacture of explosives and other war materials.
  - 4. Ethanol, which is used in the manufacture of explosives and other war materials.
  - 5. Propyl alcohol, which is used in the manufacture of explosives and other war materials.
  - 6. Butyl alcohol, which is used in the manufacture of explosives and other war materials.
